PERSONALIZING LEARNING TO SUPPORT DATA DRIVEN INSTRUCTION
PRESENTED BY: DANIELA RANIERI

LEARNING GOALS:

Overview of Renaissance Reports

Review and explore learning across the curriculum and standard based adaptive and targeted lessons In Freckle

Differentiation and scaffolding tools to enhance data driven instruction and student learning

Foster multilingual learners in the four modalities

Reflections

Easily identify each student's individual level and deliver "just-right" practice aligned to Math and ELA standards. As students practice independently, Freckle continuously adapts and provides content that fits the variety of ways students learn best.

What are Articles and Stories and how do I assign them to my students?

What is ELA Skills Practice and how do I implement it?

What is Grammar Skills Practice?

How does ELA Read-Aloud work?

🖨 Print Topic | ✉ Email Topic

Feedback ▸

Text-to-speech Read-Aloud support covers the entire ELA Library and ELA Skills Practice. Teachers can decide which students are able to use it—watch this short video (20s) to see and hear how Read-Aloud support works for students.

By default, all students reading at a 1st-grade level and below now receive Read-Aloud support when practicing in the ELA Article Library and ELA Skills Practice. When Read-Aloud is enabled for an ELA practice session:

🔊 Students see an audio button next to each body paragraph.

🔊 Students see an audio button next to each question and answer choice.

Each word is <mark>highlighted</mark> as it is read out loud.

Teachers can customize the Read-Aloud setting as desired to ensure that specific students always or never see ELA Read-Aloud support. For example, a student reading at a 6th-grade level can get Read-Aloud support if they need it as an accommodation. By default, for ELA Articles and ELA Skills Practice (Nonfiction/Fiction):

- Read-Aloud is turned on for pupils with a Reading Level ≤ 1C, but can be turned off.

- Read-Aloud is turned off for pupils with a Reading Level > 1C, but can be turned on.

💡 Read-Aloud is currently not available for ELA Skills Practice (Grammar).

Teachers can customize these settings from the new "Support Settings" tab of the Edit Student Page:

Edit Student

Roster / Edit Student

◉ Trust Freckle Defaults ❓   ○ Always Show   ○ Always Hide

Audio settings for students are shared between teachers.

[Apply to All Students in Class]   [Apply Student Settings]

- Teachers can choose to "always show" or "always hide" read aloud support from a student, overriding the Freckle defaults.

- Teachers can apply this setting to one student at a time, or all students in a class.

Counting & Cardinality	Base 10	Operations & Algebraic Thinking
NY-K.CC.1 - Count to 100	NY-K.NBT.1 - Numbers above 10*	NY-K.OA.1 - Basic Addition/Subtraction
NY-K.CC.2 - Count from Non-1*		
NY-K.CC.3 - Write Numbers 0-20*		NY-K.OA.2A-B - Addition/Subtraction in Word Problems*
NY-K.CC.4A - Count Objects		
NY-K.CC.4D - Ordinal Numbers		NY-K.OA.3 - Decompose <10*

Questions

- What are you wondering?

- What questions do you have when navigating Freckle?

- How can you utilize the assignments to drive data driven instruction?

- How will the data reports help you determine areas to support your students?

- How can we utilize Freckle to support Tier 1 instruction?

Earning Coins

As students practice on Freckle, they earn coins for questions they answer correctly, and they lose coins for questions they answer incorrectly. A few important things to note:

- The loss of coins is necessary because otherwise students quickly figure out the fastest way to get coins is to guess on every question.

- The coin totals reset daily to give every student a fair chance to climb to the top of the leaderboard.

- Coins are gained at the same speed, regardless of the level at which the students are working.

- While different parts of the Freckle program can award different amounts of coins, earning coins will always depend on whether students are answering questions correctly.

Using Coins (The Piggy Store)

K–8 students have the option of dressing/decorating their avatar using the coins they have earned. The Piggy Store isn't always open—students have to earn their trips to the store by completing assignments or practicing on the app. Students must earn 50 coins to earn a trip to the Piggy Store. The program will ask them if they want to take a trip to the Piggy Store. Once there, they will be given either 90 seconds or an unlimited amount of time to pick out different clothing and accessories (edit students in the Roster to change the Additional Time settings).

In the Piggy Store, students will be able to see how many coins they have available to spend. They will also be able to reference the amount of time they have left in the store.

If students see an item that they want to purchase, all they have to do is select the item. It will then open the option for the student to buy that item.

If students try to purchase an item for which they don't have enough coins, the program will let them know that they need more coins for that particular item.

If the 90-second time limit is in effect, after the time has expired, students will be returned to the program to continue their work. We decided to include a 90-second time limit to ensure the focus of the program is still on the various subjects offered, while the Piggy Store remains a positive reinforcer; however, we realize that some students with special needs may require additional time to make their selections and purchases in the store.
