

Name: Lizzy Gorduno Rosas
 Grade: 1st
 Teacher: Ms. Gonzalez and
 Mrs. K. S. 197

Vocabulary

Reduce means to make something smaller like less gas bags!

Reuse means to continue using things you already have instead of throwing them out and buying new ones. An example is making a pizza base from a soda can.

Recycle means to take something old and making it into something new.

Upcycle means to recycle in a way that the item you made is better than the original.

Name: Lizzy Gorduno Rosas
 Grade: 1st
 Teacher: Ms. Kasper, Ms. Gonzalez

I designed a school supply holder. I used 7 cans a piece of cardboard. I decorated with drawings I made out of scrap paper. My design shows how you can make something new and useful with items that were going to go to the garbage. Recycling is good for the environment, wildlife and sea life.

Lizzy Gorduno Grade 1 G/K. Upcycling remote learning 20'

Teacher reply: Litzy I love the birds eye view of the 7 containers it looks like a flower design! The Earth day theme that you put around the outside was so clever. I like how you used the blue painter's tape as the ocean water. Its so nice you know have a place to store all you supplies for online learning

Mathew Rodriquez- Grade 1 G/K

Upcycling remote learning 20'

Wow Mathew! What a great looking tractor trailer. You used so many recyclables, cardboard, cartons, and plastic. What kind of products are you hauling? You could put picture details of those products on the side of your truck if you wanted to identify what is being transported by your truck. I bet with enough time you could make a whole convoy of trucks to play with!

Hooray your making another truck and I see you identified what the truck is hauling!

Ashley Alvizures 4 V/G- Upcycling remote learning 20'

Student Said, “This is My project I made this from a water bottle, and I painted it green. Also, I put tape in the middle for design so that area wouldn’t have any paint.

Teacher reply: Ashley, great first attempt at upcycling; taking something designated for the trash and using it to help you organize your materials. I love that your design it to have a handle. I like the technique you used to mask out the paint in the middle of the bottle so we can see better into the cup

How many reusable resources can you make art with?

Teacher reply:

Benjamin this is so impressive. You used so many recyclable materials that may otherwise ended up in the garbage. It seems like your intention was to draw attention to all the hard work that is going on in hospitals like NUMC by doctors and nurses! I also love your positive love and hope message to the Hempstead community! Great Job! Do you know anyone who is currently working there? What was your inspiration for this idea?

Alexander Ali Plastic Pencil Organizer

Perfume Bottle Bank

Teacher reply: Alexander 2 great useful Ideas! For fun you should estimate how much money you will have when you finally fill that whole perfume bottle up! I am glad you completed your project, but I would really love if you could try to be more consistent about attending our Zoom sessions. I have so many fun things we do related to this upcycling lesson that I want to share with you. I can't wait to see what you do with our next challenge! "
