

Selvin Rios E/W 3

Teacher replied: Selvin, thanks for sharing your poem with me! Here is a great song to help you remember the 3R's Reduce, Reuse and Recycle! How many of these helpful things do you already do? How many more environmentally friendly things can you do?

Melody Villalta- Grade 2W

Cardboard Flower Sculpture

Student wrote: "Ms. Chester, I had so much fun making this project and it was easy to make. I used. I worked with my Mom. I had to add a couple of layers of paint to the cardboard."

1. Paper towel cardboard
2. Toilet paper cardboard
3. Glue
4. Paint
5. Paint brushes
6. scissors
7. Cotton

Teacher replied: "Melody look what you did with just a little imagination and some available cardboard. What a beautiful idea to make a vase of spring flowers! I'm sure you had a wonderful time cutting and gluing with Mom. Your flowers are so delicate and happy looking, and you smile in your picture made me smile! Here is another challenge for you, now that you have this 3D object try creating a drawing of your Upcycle sculpture and add details that you couldn't add to your sculpture. I bet your drawing will be as successful as your sculpture. When you're done don't forget to send me pictures! Ms. Chester"

Jacqueline Gonzalez – Grade 6

The Art of Upcycling; Remote Learning

Ask yourself ...before I throw something away can I UPCYCLE and make Art with it?

Student said, "What I made was a butterfly. To do this, I used a piece from a cardboard box, paint, and water bottle caps. There really isn't much inspiration that went into this project. All I did was some research and brainstorming and then thought, Hey, I like butterflies! and that's how my project came together. This assignment was a little messy. I know I could've done better, but at least it's something. What I've learned from this art project is that not everything is perfect".

Teacher said, "This is a beautiful idea and your right not everything is perfect and that is what makes the world go around and your work special. In your design I see symmetry and asymmetry. Do you know what I am talking about? Please look up those 2 words. Never put yourself down you always do exceptional work in art and participate and seem willing to learn. Most great artists are too hard on themselves. Don't be hard on yourself just be great! So how do you think you could improve this to the point that you think it's awesome like I do? What would you have done differently?"

Darwin Escobar

My project is Nintendo Switch Model

Items I used:

- glue gun
- glue sticks
- black marker
- Red marker
- sticks

The student said “The steps I took to make the project are ... First, I got the hot glue gun hot and started to line up the sticks, after I glued the sticks and made sure that they were even. Then I made the” joy cons “and painted them red and blue then I wrote my name on it. I felt happy that I did the Nintendo switch model because I knew no one would do something like this and it would be unique, so I felt happy while doing the project. **Teacher said** “Great job finding materials that lent themselves to accomplishing your idea. I can’t wait to see what you do with our next challenge. I really loved the idea that you were trying to be unique And you are right no one else did this idea.

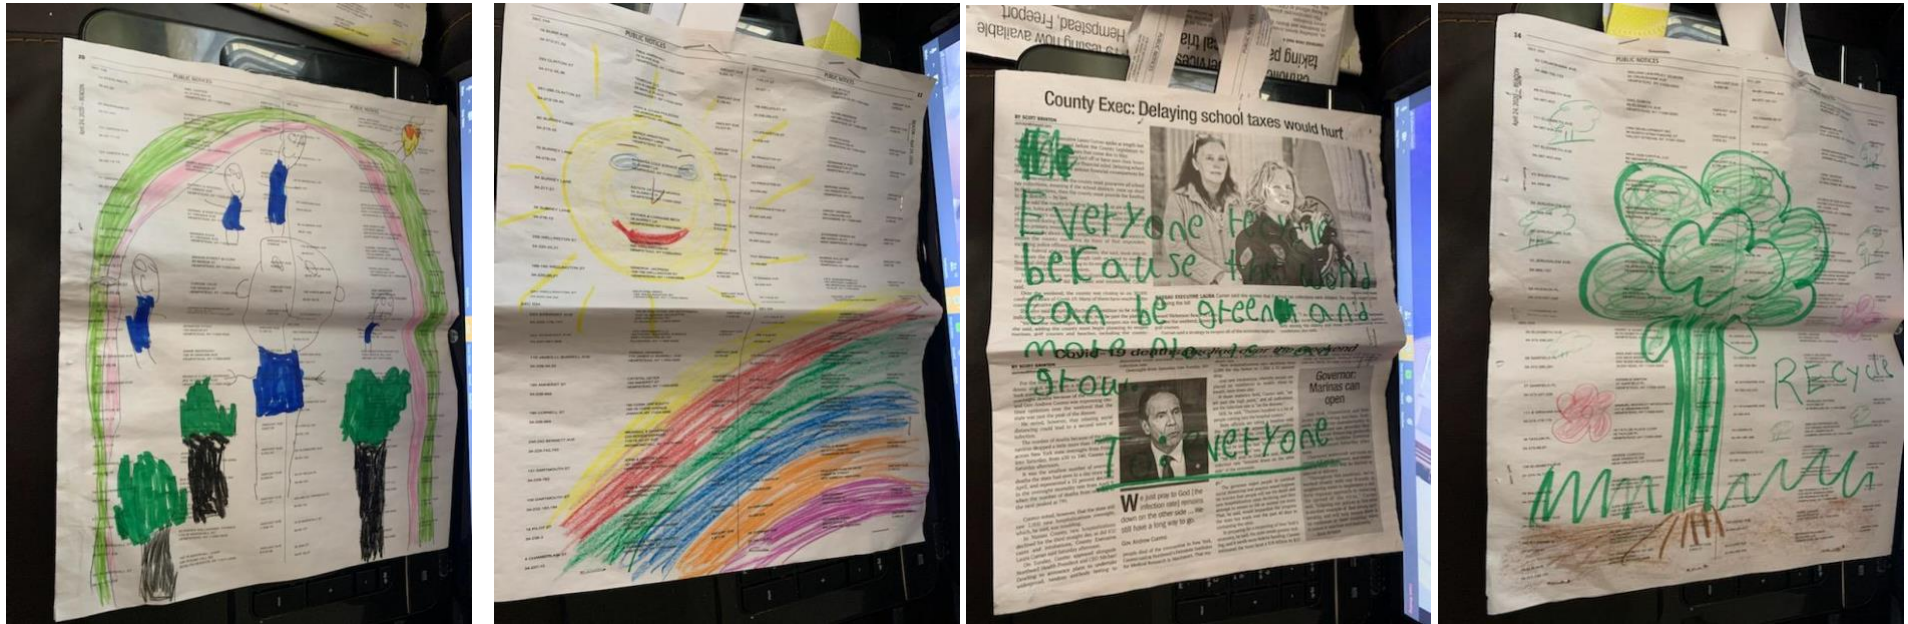

Rodrigo Quintanilla's Grade 5 A/V
Upcycling remote learning 20'

translated by Google Student said, "For my project I opted for a something that looked like a duckling. I am trying to make my two-year-old brother learn to use antibacterial soap more often and thought this would make it fun for him. I did this without help from anyone. I hope he likes it

Rodrigo! Such a beautiful idea to do something to help your brother. What kind of a container is that? The shape of the original container defiantly lent itself to your idea.! Great job!

Adriel Macario Grade 2D/H Reusable Paper Bag with Handle

Student said “I made a reusable bag with a handle from old newspaper and my brother made one to. We decorated the bags after wards with Earth Day pictures. I can’t wait to send pictures to.”

Teacher Replied: Adriel, I received your artwork pictures from the text you sent to Ms. Donnangelo. Thank you so much for being so persistent about getting your work submitted. I love the multiple views that you sent It gave me a real good idea of how hard you and your brother were working. 📧 Your reusable bags made from old newspaper with beautiful designs about Earth Day were just outstanding!

There are so many wonderful upcycled art projects you can do right in your own home with materials you already have available. You just need to look around and use your imagination. Would you like to start another project for extra credit? Something completely different using other found materials. In our next Zoom session let’s review how to send your artwork directly to my Email kchester@hempsteadschools.org.” in the future or ask for my google phone number to text me at What’s APP whenever you have artwork to submit.
