

## Grade 1

# **Organizing Ourselves to do Science Investigations**

- Organize ourselves and materials
- Working like Scientists
- Working like Scientists

#### **Investigating Properties of Objects**

- Observe properties of objects
- Organize by properties
- Determine specific properties of objects

### **Physical Setting: Solids and Liquids**

- Observe & describe properties of solids and liquids
- Test solids & liquids to investigate properties that cannot otherwise be observed
- Compare the similarities & differences among solids & among liquids
- Compare the properties of solids with those of liquids
- Use charts, etc., to communicate observations

# **Exploring our Solar System**

- Rotation of the earth around its axis
- Rotation of the earth around the sun
