

WELCOME!

I'm so glad you're here! I hope you enjoy using these free math manipulatives to print and enjoy while working on math!

For A LOT of fun math ideas, please check out my *FAVORITE* posts under "Math" on this page:
[Miss Giraffe Best Blog Posts](#)

They show A LOT of fun ways to teach math that kids love!

If you love this, please be sure to [Follow Me on TpT](#) so you see when I post new items!

I hope you love these!

WELCOME!

Dear Parents,

Here are some math manipulatives for your child to use at home.

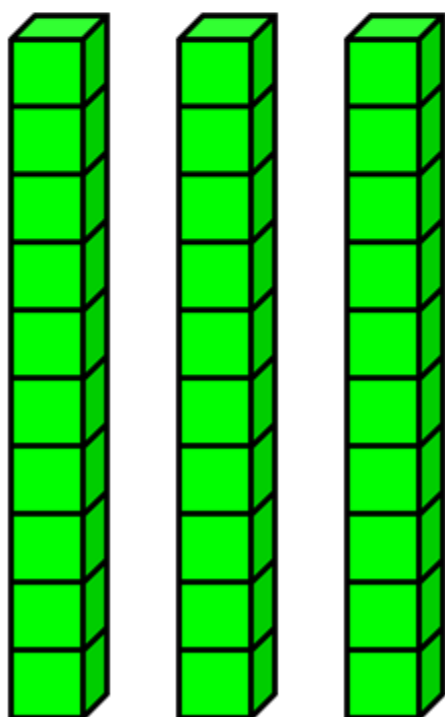

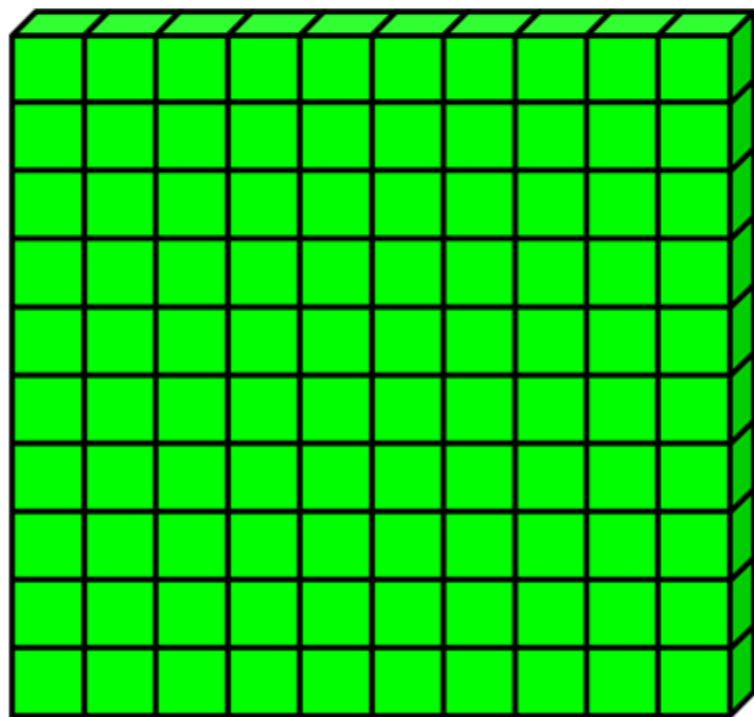

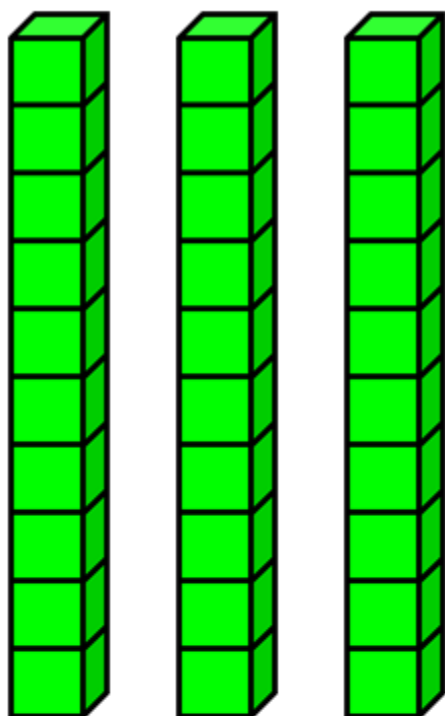

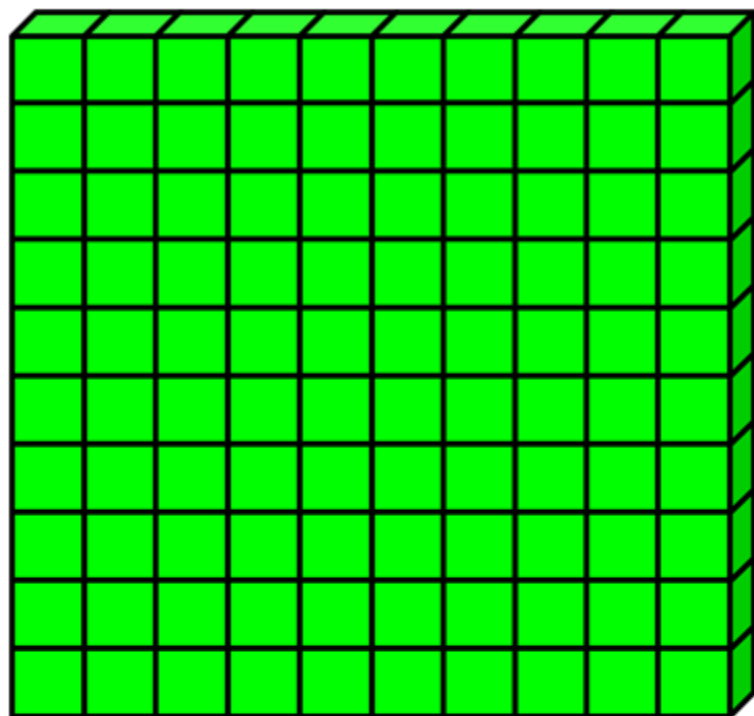

These are very helpful for students to visualize the work they are doing.

I recommend cutting them out and placing them in a bag or bucket for your child to use during math time.

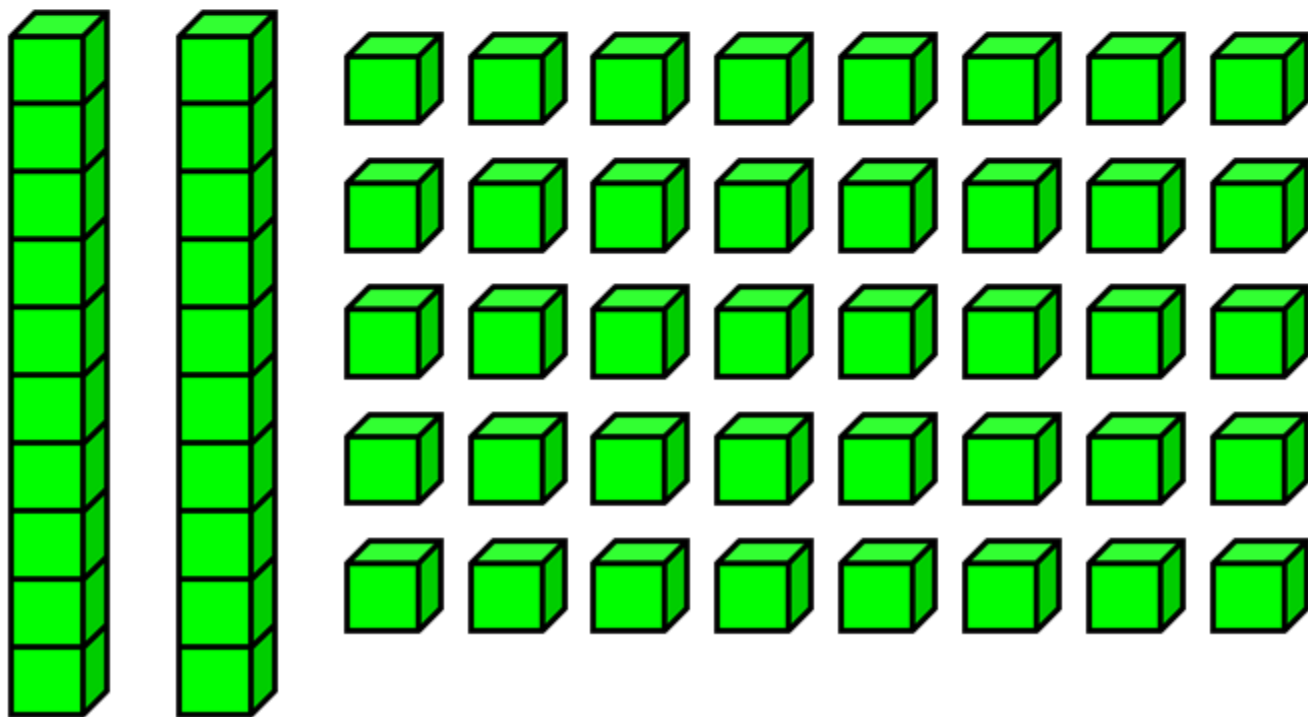

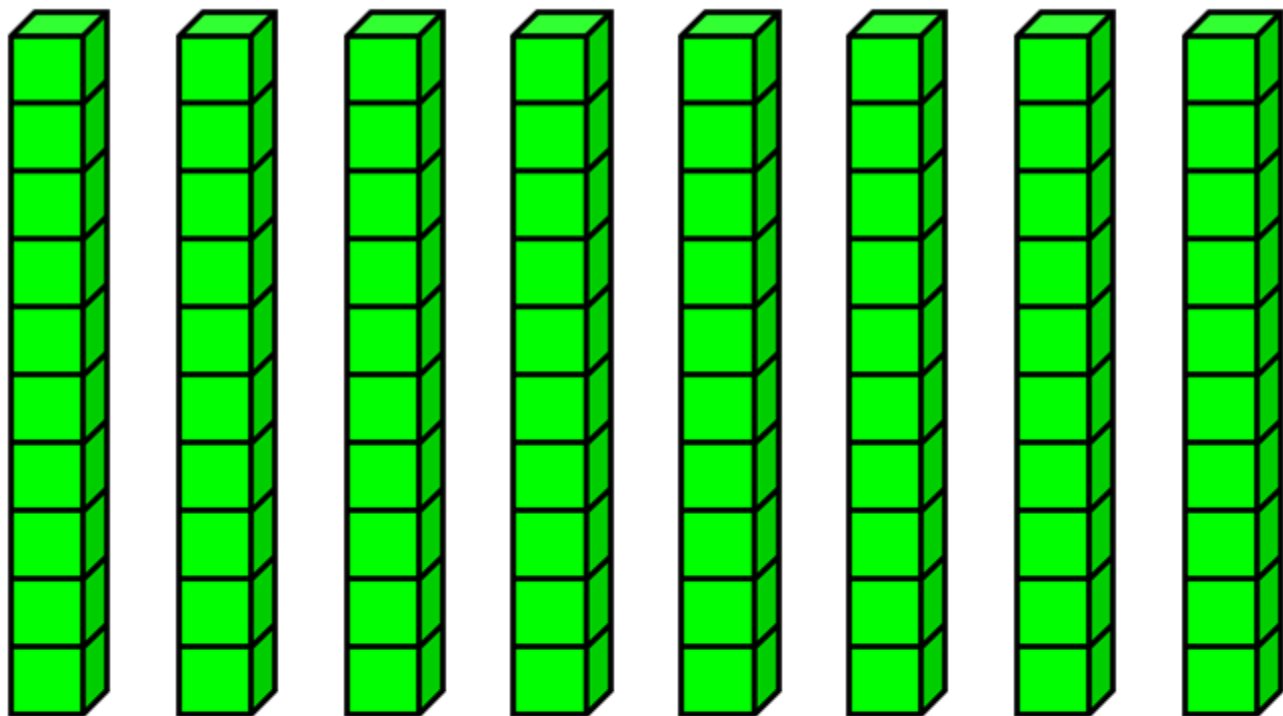

I provided color options, as well as black and white.

Please let me know if you have any questions. I hope you enjoy these!

Credits!

I am so excited that I made these myself for you to use! :) You may use them for the students in your individual class or to use at home with your children. They may be shared with your own students electronically but you may not post them publicly. These are NOT clip art and may not be used commercially.

If you want to share these with someone, please send them to:

[Free Math Manipulatives](#)

to download them themselves.

This way, if I make any updates in the future, they will be able to download them for free. :) I would also LOVE if you took a moment to leave feedback! Thank you!

I hope you love these! Love, [Miss Giraffe](#)
